-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-5,8,9,11-14,17,18,21-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Knell et al. Knell et al disclose a method of selectively removing patient data from an image transmitted over a network. A diagnostic image (ultrasound) is obtained and patient information is excluded from the image transmitted by eliminating it from the composite image formed. The removal of the patient data is equivalent to the masking of such data. In the absence of any showing of criticality, whether the data is eliminated as disclosed by Knell et al or merely covered up would have been an obvious design choice in that Applicant has not disclosed that applying a mask to the image provides an advantage, is used for a particular purpose, or solves a stated problem instead of removing the data. One of ordinary skill in the art, furthermore, would have expected Applicant's invention to perform equally well with the patient data removed by forming a composite image because making the data not viewable by those reading it from a network is not affected by how it is made not viewable.

Response to Arguments

Applicant's arguments with respect to claims 2-5,8,9,11-14,17,18,21-23 have been considered but are moot in view of the new ground(s) of rejection.
